

*A New
Beautiful
Alternative*

UrbanStone

In 1991, Stonetile stunned the building industry with a tile product that revolutionized the process of exterior cladding. Once again we are ready to rock the industry with a radical line of tile design.

Service and innovation have given us the edge. Our limestone concrete siding tiles feature 10mm galvanized metal hangers which are then affixed with screws to the wall. No mortar is necessary. Joints are filled with a flexible durable filler to create a seamless effect. This process of exterior cladding was the first to secure government approval for rain-screen technology in a manufactured stone product. It continues to be the favorite with builders, architects, and homeowners alike.

Thousands of beautiful buildings have been created using Stonetile's architectural exterior products. But we are not just keeping pace with building designs, we are setting the pace.

It gives us great satisfaction to introduce our newest line of 3 D designs:

URBANSTONE

12 bold new patterns to inspire the designer in you.

> Athens > LaPalma > Milan > New York
> Barcelona > Mahal > Mykonos > Tokyo
> Buckingham > Mardi Gras > Napa > Vienna

We have created, produced, and presented you with choices, it is now up to you.

Dare to be bold!

Athens

Authentic
Iconic
Enduring

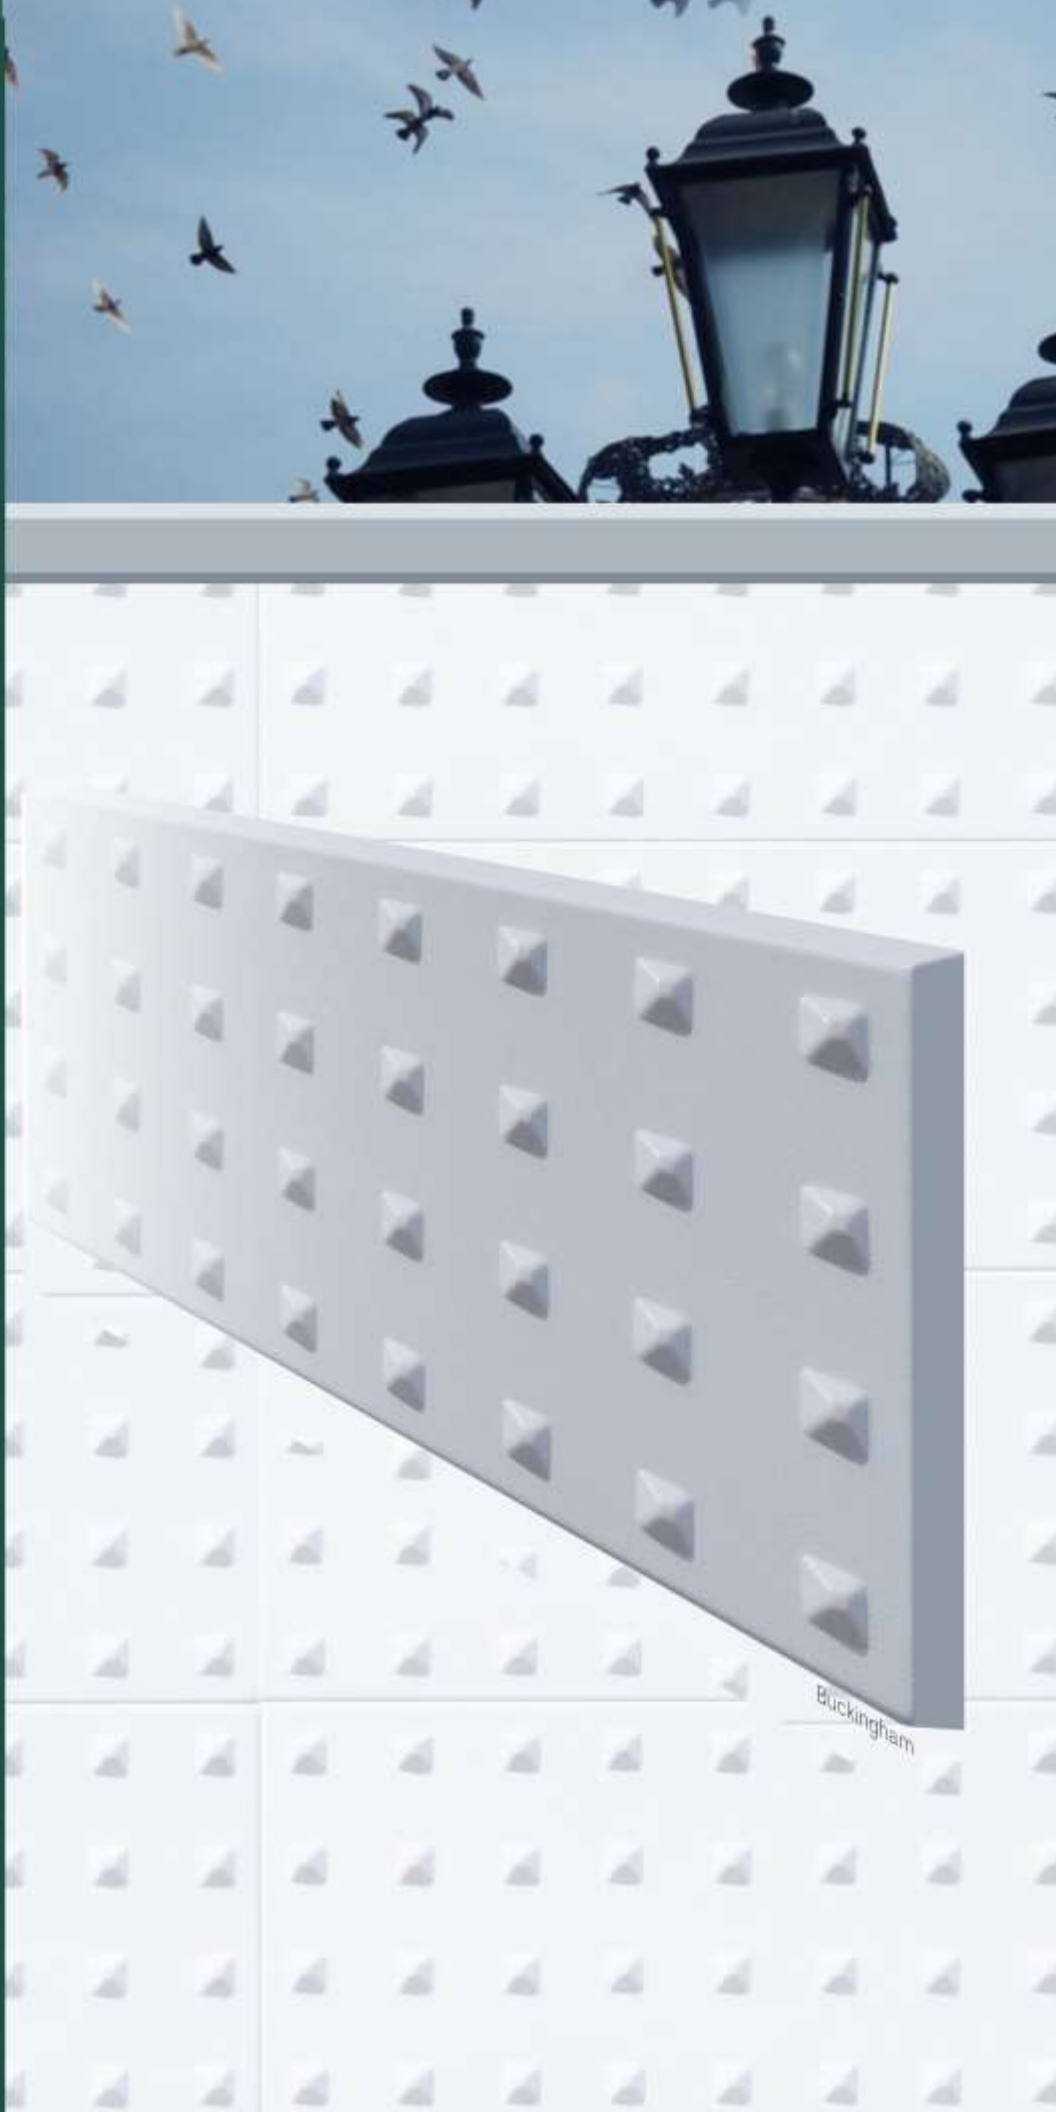

The muse and mastery of ancient design in a contemporary structure suggests an assured lifestyle. A timeless choice.

Buckingham

Grand
Courtly
Resolute

Impenetrable walls with the promise of privacy make for a very bold design statement. An air of royalty and aristocracy.

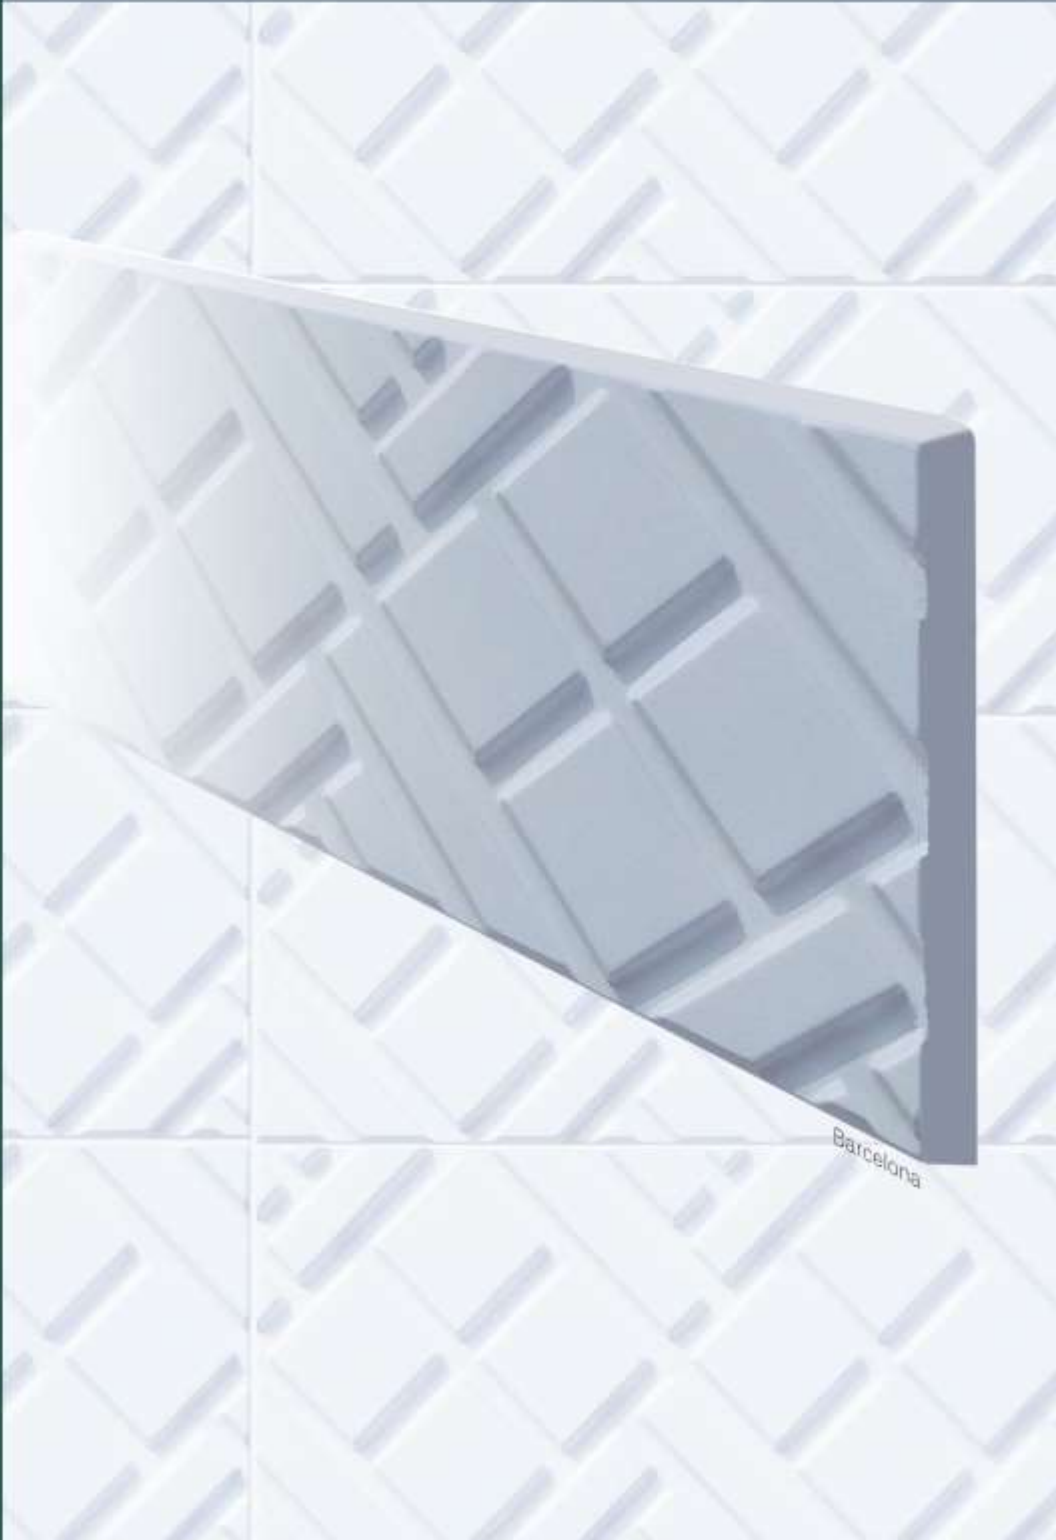

Buckingham

Barcelona

Bonito
Mediterranean
Trade Cantral

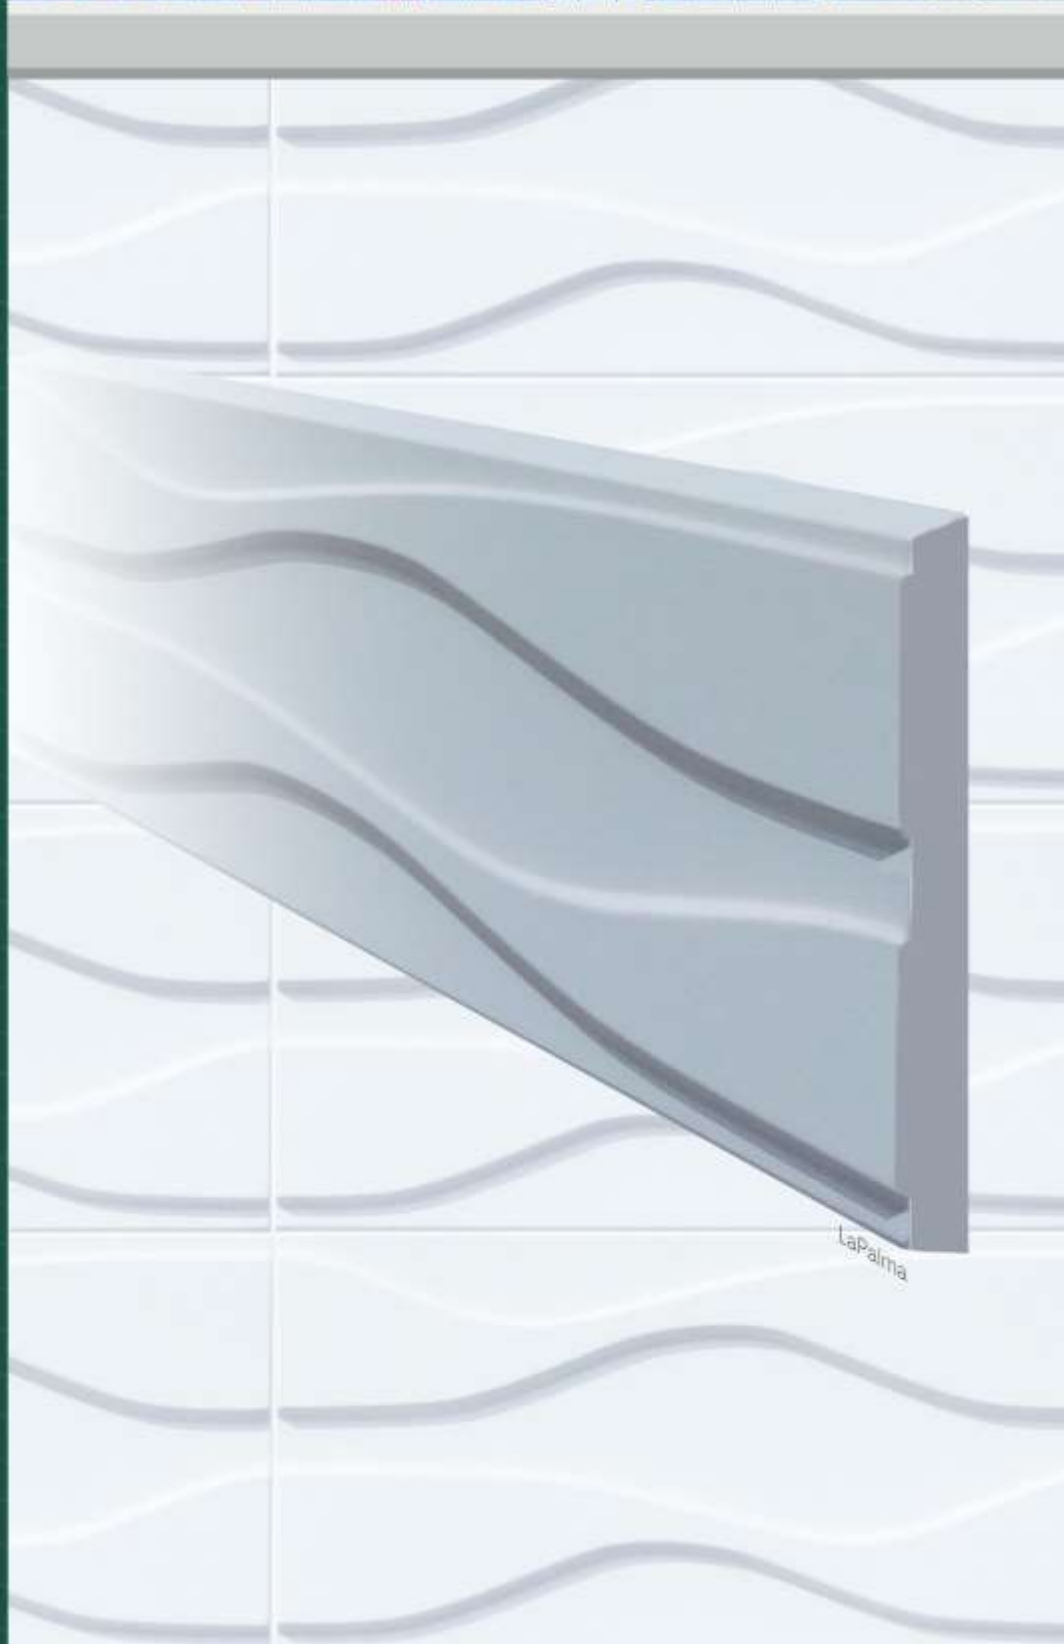

For the modernista,
the contemporary
lines embedded
with a rich history
allude to a touch
of class.

LaPalma

Sun
Rolling Hills
Gentle Breeze

Easy living woven into
the walls of a public
space. Inspires
conversation and
relaxation.

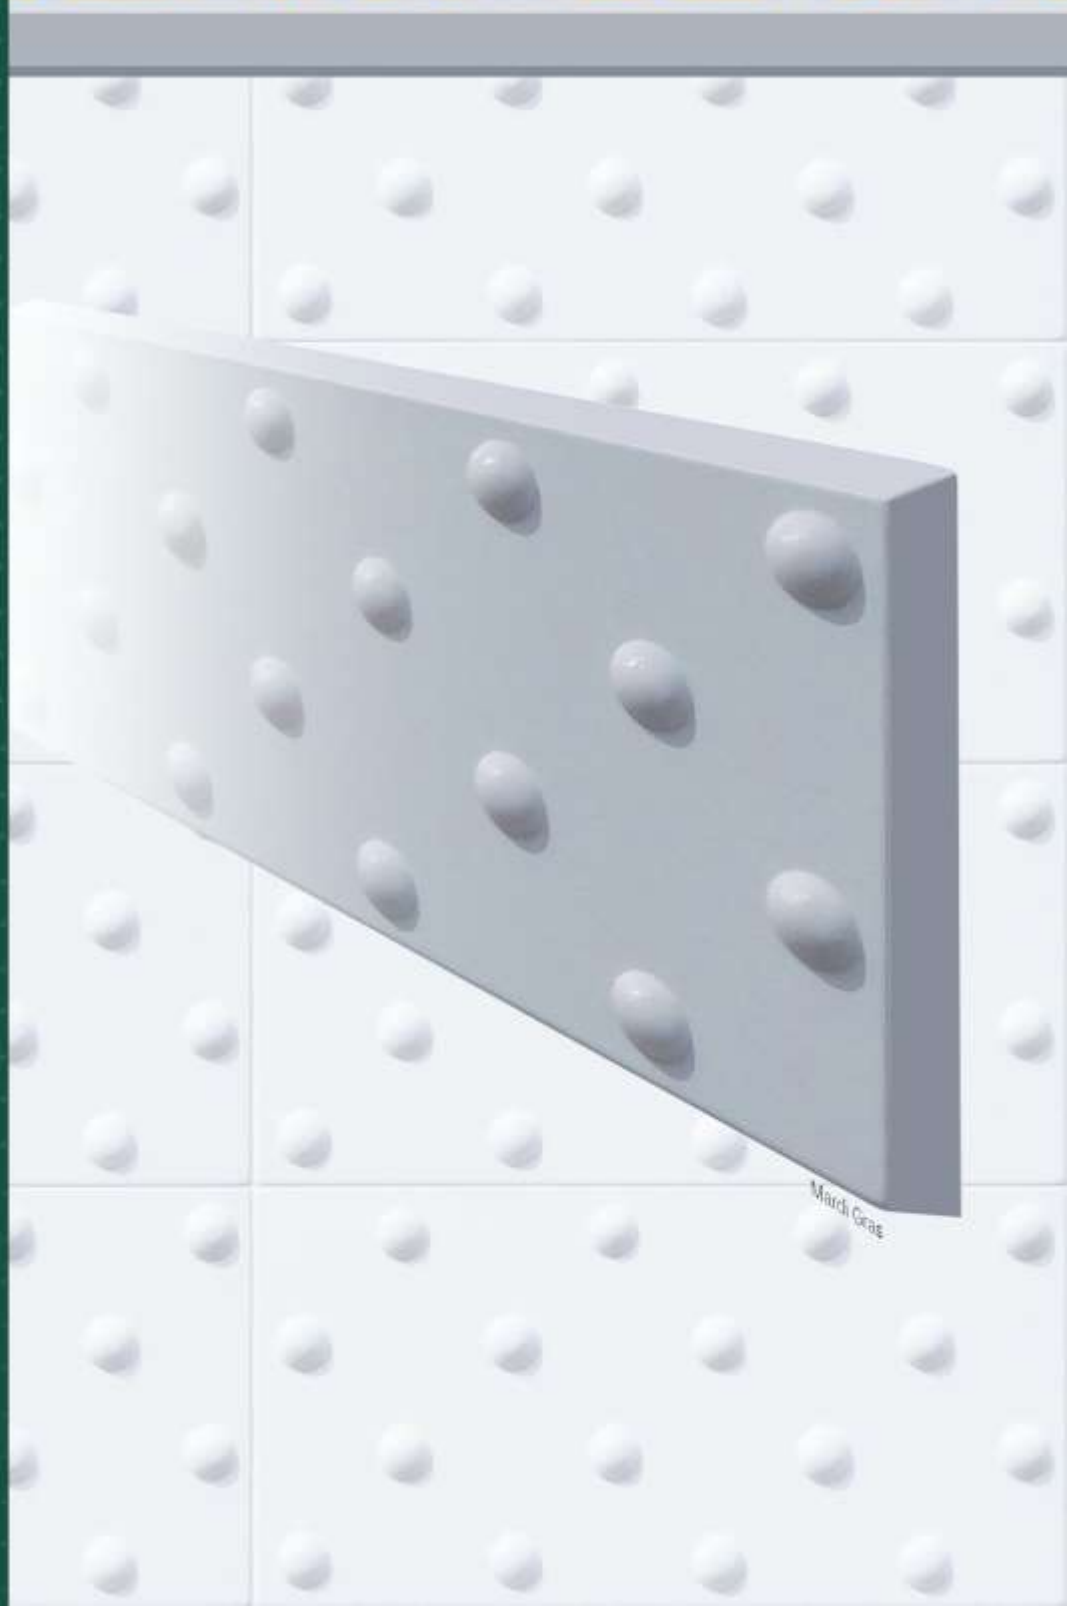

LaPalma

Mardi Gras

Community
Harmony
Bold

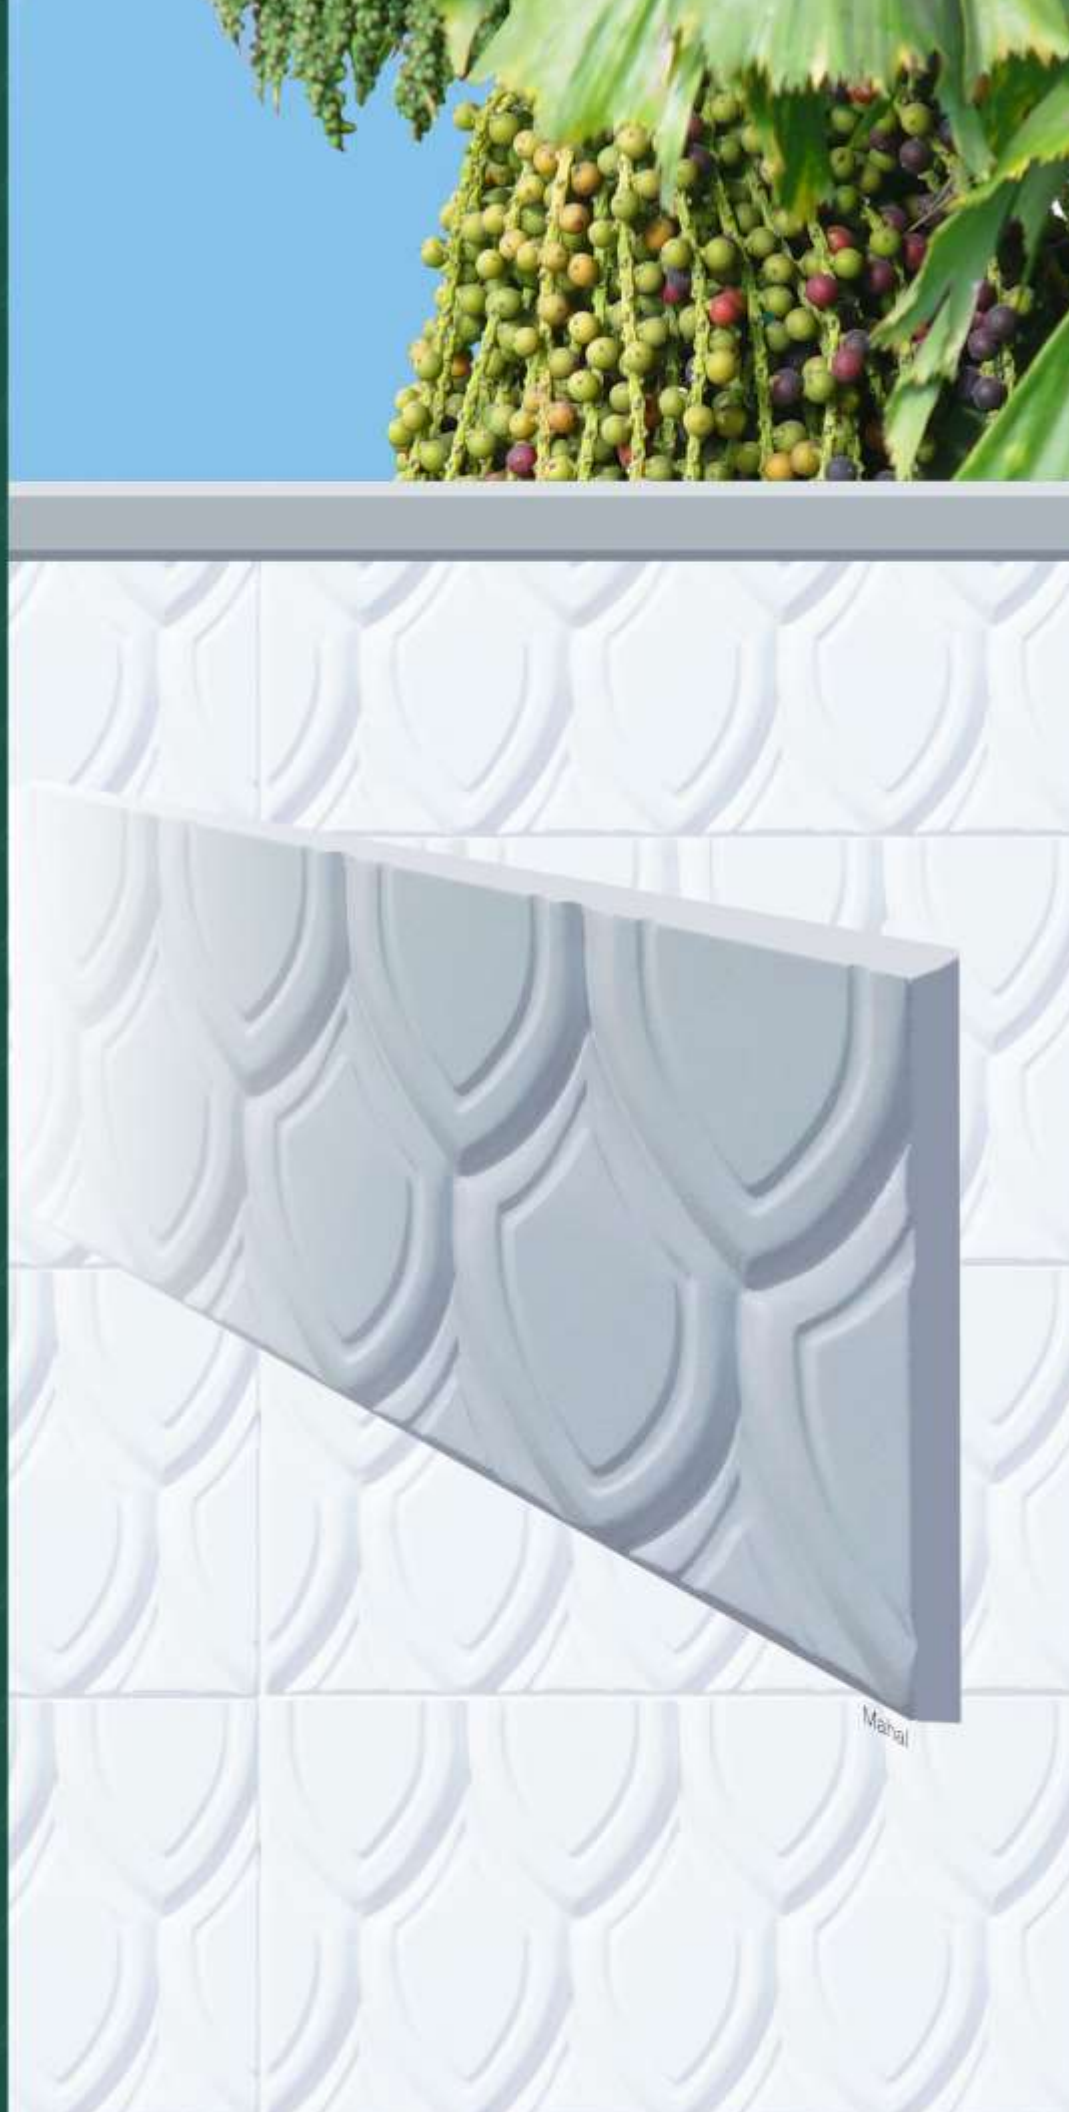

A quality of
aesthetic that
inspires social
and cultural
partnership.

Mahal

Prosperous
Palatial
Encompassing

A cloud-like canopy
gives form to the
quality of commerce
infused with the
sacred. A well
appointed pattern.

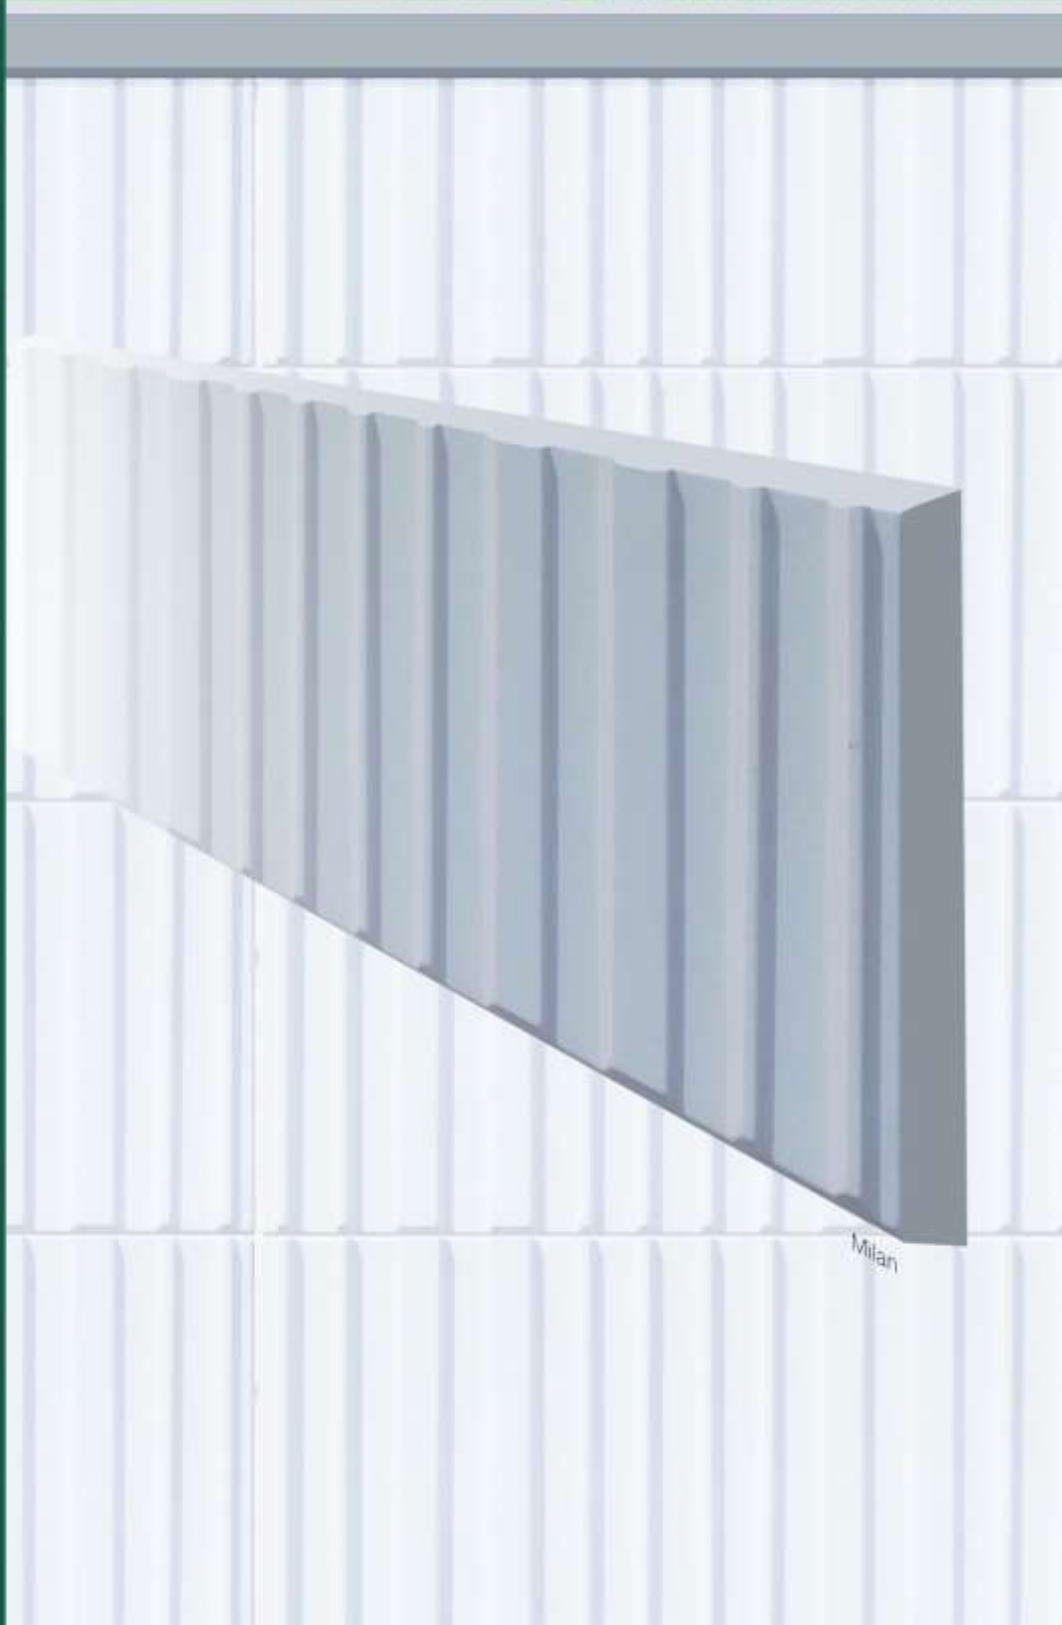

Milan

Global
Capital
Powerhouse

The stately lines of this design stand gracefully on their own. When coupled with several of our other tile patterns the effect is daring and dynamic.

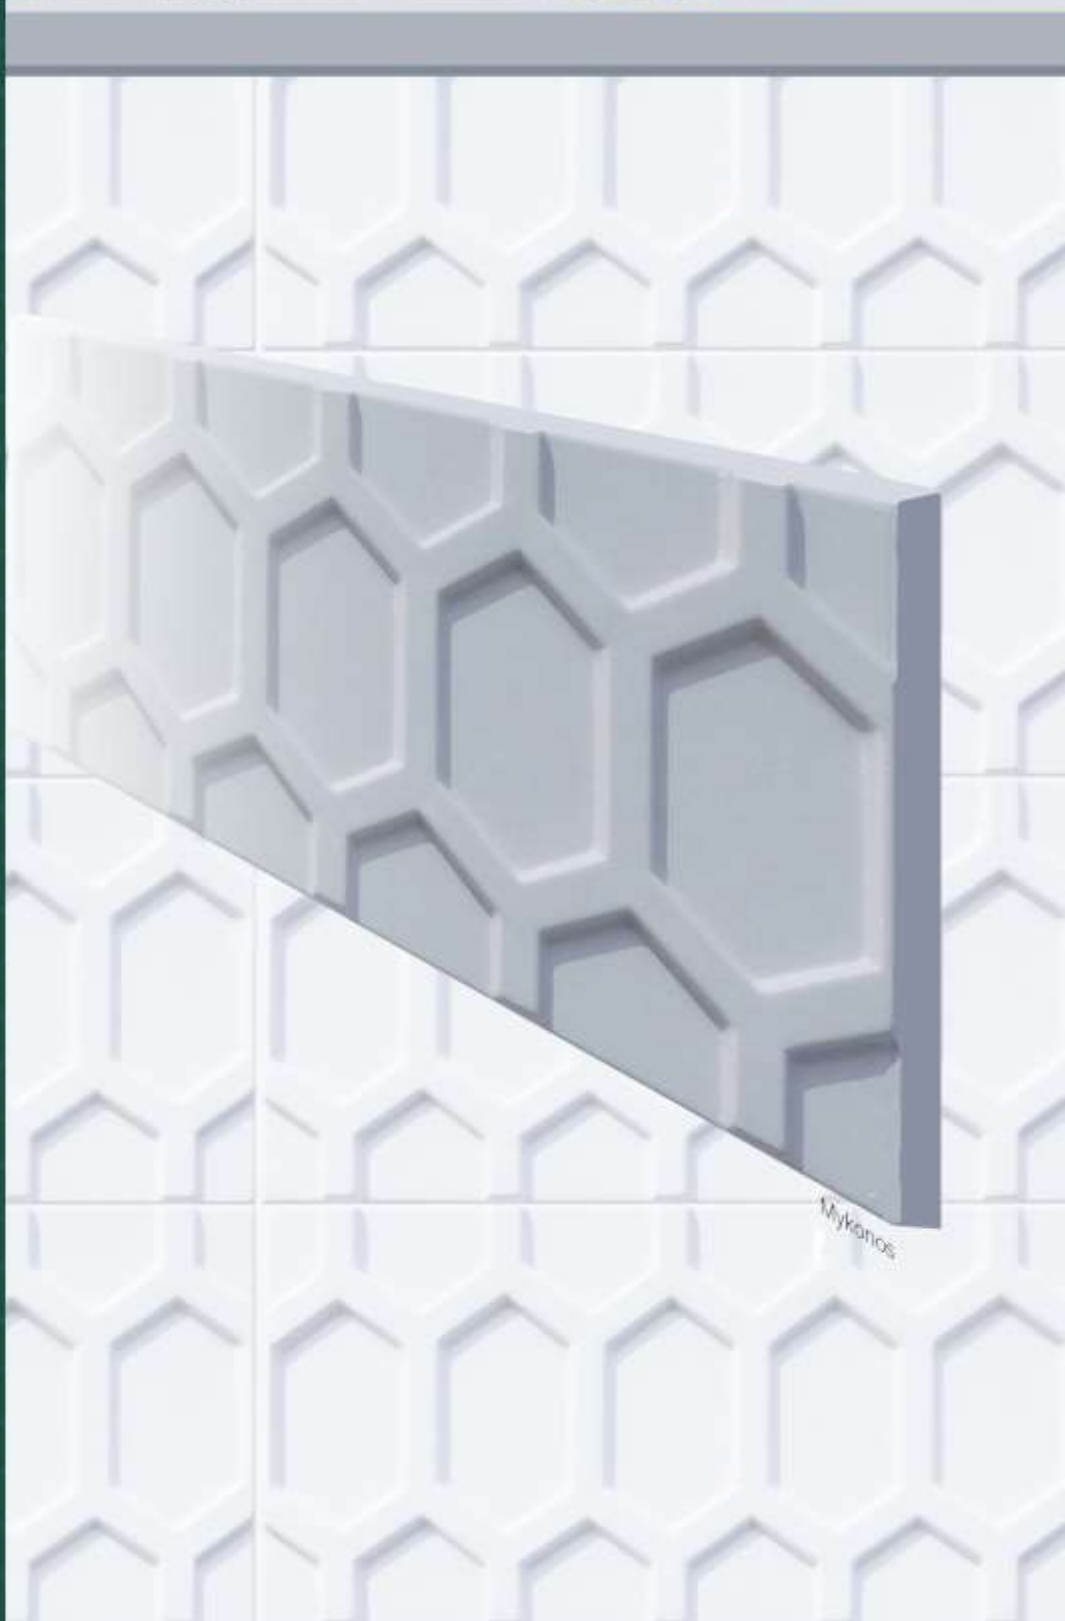

Milan

Mykonos

Smart
Diverse
Festive

A honeycomb mesh of space and materials makes this ultra efficient design universally appealing.

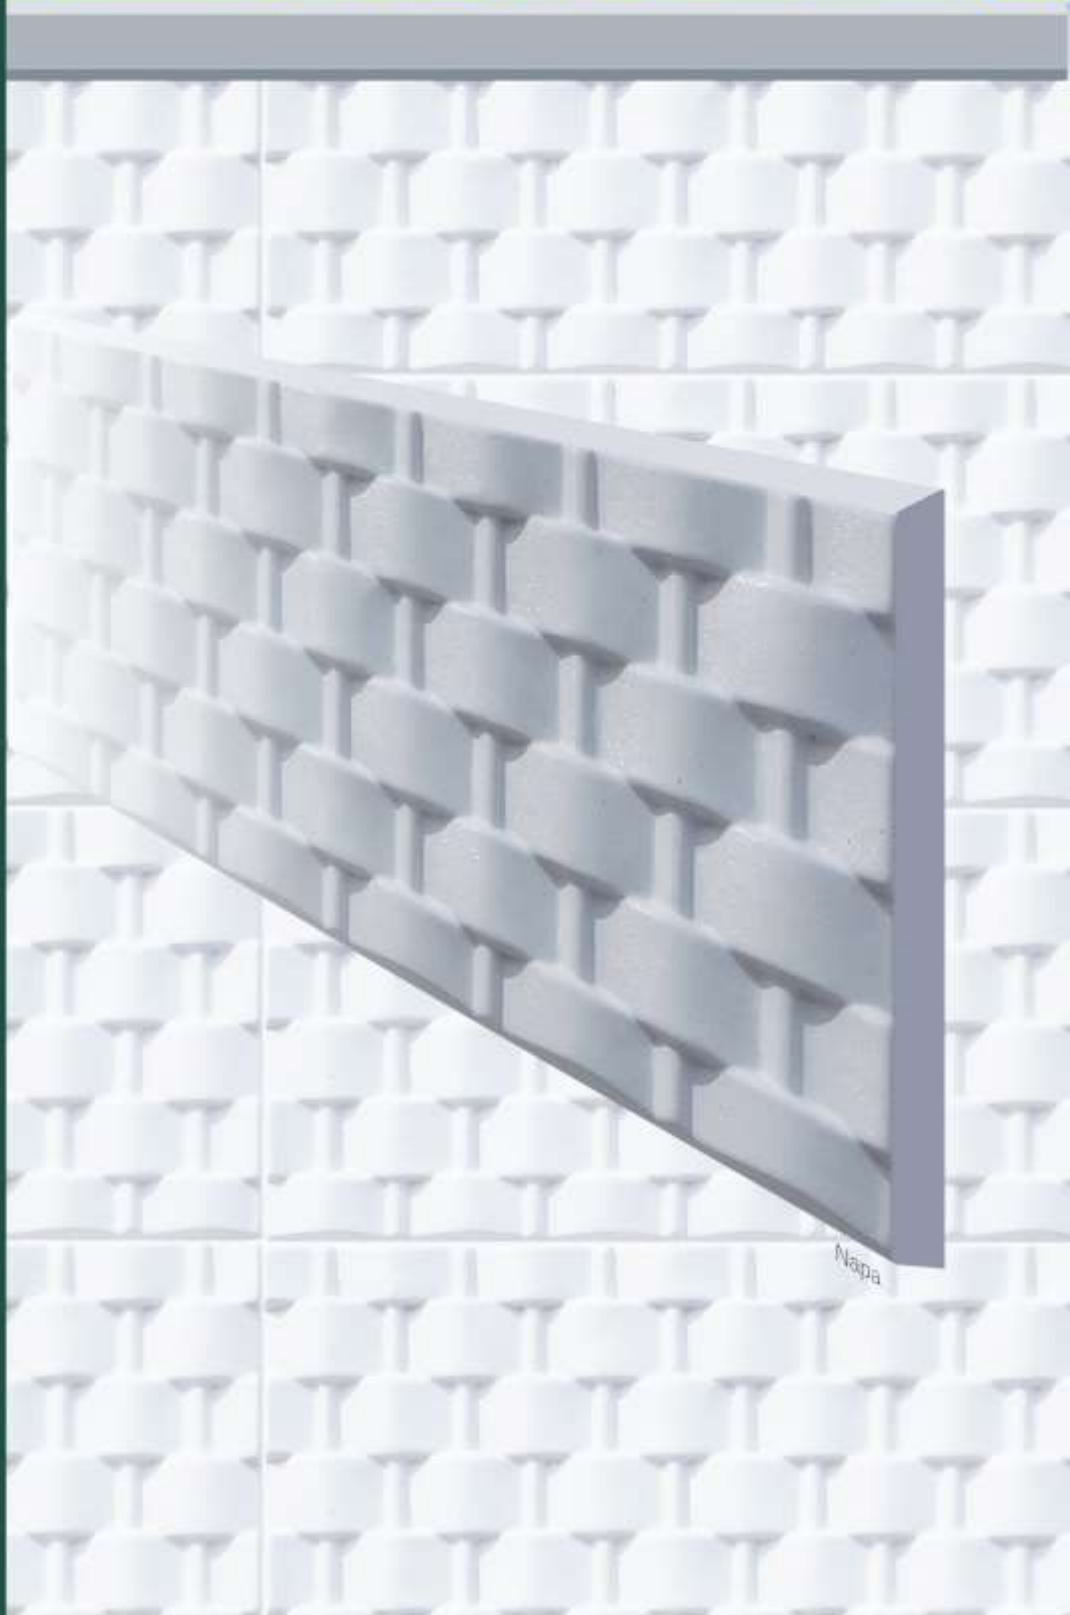

Mykonos

Napa

Earthy
Orchards
Exchange

Suggests an integrated lifestyle where work and leisure are of equal value and the bottom line is certain satisfaction.

New York

Rhythmic
Literary
Thriving

Always in vogue, this design spills units of space one into the other like people into places. Cosmopolitan connections.

Ultra Modern
Ascending
Progressive

Organizes serene
spaces within the
bustle of culture
and commerce.

Tokyo

Vienna

Classical
Cultural
Rich

This pattern has the
indescribable quality
of beauty set to music
yet it's regal overtones
make it a solid choice.

Vienna

Technical Information:

Dimension:

12"H x 24"W x 3/4"D plus
3/8" (10mm) rain-screen air space

Base Color: White

Recommended Stain: H&C Concrete Stain

Rain-Screen System:

The UrbanStone is produced with 10mm Rain-screen galvanized metal fasteners. The fasteners create the air space behind the tiles from which water will drain and condensation will be vented out. Rain-screen minimizes the risk of mold and rot development in exterior walls.

Thermal Expansion:

UrbanStone features a patented edge design which prevents expansion and thermal cracking.

UrbanStone Materials:

UrbanStone is produced with pure crushed limestone free of impurities such as ironstone, coal, clay and pyrite which may cause pop-outs and rust spots. Using pure crushed limestone results in a high density concrete that minimizes water absorption. Concrete produced with lightweight materials is typically highly water absorbent.

Fastening System:

We recommend that the UrbanStone tiles are installed with 1" #8 corrosion resistant screws on framed wood walls which are sheeted with 3/8" plywood or OSB.

Joint Filler:

The joints are to be filled with Tremco Dymonic FC caulking. Fine silica sand is then brushed onto the freshly caulked joints. These joints have the appearance of mortar joints and will remain flexible preventing cracks.

The Barcelona Tile is used effectively as an Accent on this Contemporary Residential Structure.
